COSTUMER PROFILE

Name of Enterprise: Romblon State University–Research, Extension, Development and Innovation (REDi)

Address: Brgy. Liwanag, Odiongan, Romblon

Year Enterprise was established: N/A Initial Capitalization: N/A

Type of Organization: ( ) Single Proprietorship
(/) SUC
( ) Partnership
( ) Corporation
( ) Profit
(/) Non-profit

Name of Contact Person:

Engr. Christian M. Mortel

Position:
Chairperson, BS in Mechanical Engineering (RSU-CET)

Enterprise Registration No.: N/A Year Registered: N/A

Classification according to capital (PhP): Present Capitalization: N/A

( ) Micro (less than 3M)
( ) Small (3-15M)
( ) Medium (more than 15M)

Enterprise Classification according to employment:

( ) Micro (1-9)
( ) Small (10-99)
( ) Medium (100-199)

Number of Employees:
Direct Workers
Production _____
Non-production _____
Indirect/Contract Workers _____
Total _____

Business Activity:
( ) Food Processing
( ) Furniture (wood)
( ) Natural Fibers, Gifts, Toys and Housewares
( ) Metals and Engineering
( ) Metalcasting
( ) Machining
( ) Welding and Fabrication
( ) Others
( ) Electroplating
( ) Forging
( ) Tool, Die and Mould Fabrication
( ) Aquaculture and Marine Resources
( ) Horticulture
(/) Others, please specify R&D for Romblon Marble Cutting Process Optimization

Product lines: The project will explore a more viable option for marble cutting plant wastes by creating graded, high value ground calcium carbonate (GCC). Marble selvedge cuts and saw fines that are byproducts of marble slab cutting will be put to better use by grinding these into fine powder. The powder will be subject to chemical and physical analyses to determine calcium carbonate content, whiteness, and particle size. Marble grades based on these parameters will then be established for Romblon ground calcium carbonate. Recommended applications for these grades will be made based on standard industry requirements. The project is expected to create optimized plant operations by maximizing profits of plant owners.
