RSU Vision

A research-based academic institution committed to excellence and service in nurturing globally competitive workforce towards sustainable development.

RSU Mission

Romblon State University shall nurture an academic environment that provides advanced education, higher technological and professional instruction and technical expertise in agriculture and fisheries, forestry, engineering and technology, education, humanities, sciences and other relevant fields of study and collaborate with other institutions and communities through responsive, relevant and research-based extension services.

RSU Quality Policy

Romblon State University commits to provide higher education through quality instruction, research, production, and community-based extension services that meet or exceed the requirements and expectations of the university's stakeholders. It will comply with international standards, applicable statutory and regulatory requirements, and continually improve the Quality Management System's effectiveness through periodic monitoring and evaluation toward sustained remarkable outcomes.

RSU Core Values

Stewardship
Competence
Resilience
Integrity
Balance
Excellence
Service

These Core Values serve as our guiding principle in our efforts to make ROMBLON STATE UNIVERSITY a recognized HEI in the region and beyond.

DR. MA. JOSEFINA P. ABILAY

Regional Director

DOST-MIMAROPA

DOST Compound, Bicutan, Taguig City

Dear Dr. Abilay:

Greetings in the spirit of public service!

On behalf of Romblon State University, headed by Dr. Merian P. Catajay-Mani, I am writing to express our intent to be your recipient of the **Grant-in-Aid on Solid Waste Management through Junk Compactor Technology** from the Department of Science and Technology – MIMAROPA (DOST-MIMAROPA). This initiative aligns with our institution's ongoing commitment to sustainability and environmental stewardship as we strive to realize our vision of becoming a zero-waste campus.

Acquiring a junk compactor machine will enable us to manage waste more effectively by reducing its volume, facilitating proper disposal, and encouraging recycling initiatives. As a key proponent of zero-waste practices, this equipment will serve as a cornerstone in transforming our campus into a model of sustainable operations. Moreover, it will foster environmental awareness and responsibility among our students, faculty, and staff.

Beyond the boundaries of our university, we envision extending the knowledge and application of this technology to the local community. By sharing best practices and providing access to innovative waste management solutions, we aim to empower the people of Romblon to adopt more sustainable habits, contributing to preserving our province's natural beauty and resources.

We deeply value the support of DOST-MIMAROPA in promoting sustainable development and technological advancement in our region. Through your generosity, this partnership will serve as a beacon of positive change for our campus and the entire community we serve.

We are more than willing to provide the necessary requirements and work collaboratively with your office to ensure the success of this initiative. Please let us know of any further documentation or processes needed to proceed with this request. Thank you for considering this proposal. We eagerly look forward to the possibility of working together to advance sustainability and innovation in our shared mission to build a better future.

Sincerely,

RUEL VIRGIL M. ADRIGUEZ, PhD

Campus Director
