Regional Director
DOST-MIMAROPA
DOST Compound
Bicutan, Taguig City

Ma'am

Greetings of peace and prosperity!

The municipality of Odiongan is known as a leading town in terms of different aspects such health, education and Agriculture. However, due to lack of agricultural resources and technology, farmers in our municipality still practice traditional way of farming. These old-style ways of farming are the reasons why the municipality cannot produce maximum yield of agricultural production. Moreover, we cannot compete also to the products that our traders are importing in other provinces. However, despite of the limited resources especially in terms of technology, hybrid seeds and other agricultural materials, we still need to pursue farming because this is the source of our daily needs. With this, our organization is looking for other possibilities especially on technology that will make our farms produce more and make every effort easier. We are very fortunate that the Department of Science and Technology offered agricultural technology that will help our young farmers to be more motivated and dedicated to continue farming. We believe that this technology would ease the burden of the young farmers, and would greatly help in increasing the productivity in terms of yield of production. In this connection, we express our intention to avail agricultural related technologies such as water system using solar system and a greenhouse.

We do hope for your kind indulgence in the matter. Thank you and keep safe.

Sincerely,

RICMEL S. FALQUEZA
Club Chairman
