Career Objective:

To become part of an institution from where I can contribute my professional knowledge and skills to its clientele and experience continuing professional growth and development.

Personal Qualification

- Knowledge on weather data analysis, data simulation and modeling, design and development of weather monitoring devices using sensors and programming
 - Proficient in computer applications and CAD technologies, Micro survey CAD technical specifications, 3d printing and project design lay-out
 - Advanced knowledge in GIS Mapping and Surveying
- Trained in operating GPS device and South Total Station
 - Advanced skills in machine automation/ IOT Based
 - Understand and apply engineering science and designs to identify, analyze and create solutions for problems concerning land development, irrigation and drainage, production machinery, new and renewable energy, Agricultural buildings and structures, postharvest and processing technologies, climate change and natural resources, environment and waste management, water quality, groundwater, soil and water conservation, water management and other engineering related works.
